## DETAILED ACTION

### *Election/Restrictions*

Claims 1-9 and 20-29 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected specification, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on November 13, 2006.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Josephian (U.S. Patent No. 2,547,823). The patent to Josephian discloses a gas storage system comprising a plurality of storage tank groups (33, 35) fluidly coupled to each other and a valve (37) fluidly isolating the storage tank groups when the valve is closed. The storage system includes a pressure regulator (7, 9); see Figure 1.

***Allowable Subject Matter***

Claims 12-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
